To know more…

What is Harbor?

Harbor is a CNCF-graduated open-source container registry to store and manage container images and other OCI artifacts securely with policies, role-based access control, vulnerability analytics and signing.

HARBOR

Harbor 2.15

- https://github.com/goharbor/harbor/wiki/Release-plans
- We have just finished the Feature Complete for Harbor v2.14.
- Help shape v2.15 - share your ideas and improvements.

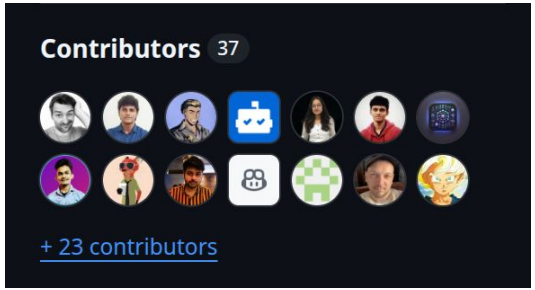
LFX Mentorship

- Projects are actively developed and being contributed by LFX mentees
  - Harbor CLI - a tool to interact with Harbor Registry
  - Harbor Satellite - Bringing Harbor to Edge

LFX | Mentorship

Harbor CLI

README | Code of conduct | Apache-2.0 license



Harbor CLI — a command-line interface for interacting with your Harbor container registry. A streamlined, user-friendly alternative to the WebUI, as your daily driver or for scripting and automation.

Artifact Hub harbor-cli | license scan passing | codecov 11% | go report A+

Harbor CLI

github.com/goharbor/harbor-cli

133% Reset

go.mod	Finalizing Robots Account cli command (#489)	
go.sum	Finalizing Robots Account cli command (#489)	2 weeks ago
harbor-cli	fix: default FormatUrl to use https instead of http (#496)	2 weeks ago

README | Code of conduct | Apache-2.0 license

Harbor CLI — a command-line interface for interacting with your Harbor container registry. A streamlined, user-friendly alternative to the WebUI, as your daily driver or for scripting and automation.

Artifact Hub harbor-cli | license scan passing | codecov 11% | go report A+

Scope

1. CLI alternative to the WebUI
2. Tool for scripting and automation of common repeatable Harbor tasks running on your machine or inside

Features

The project's first goal is to reach WebUI parity.

```
✅ project       Mange projects
✅ repo          Manage repositories
✅ artifact      Manage artifacts
✅ label         Manage labels
✅ tag           Manage tags
✅ quota         Manage quotas
✅ webhook       Manage webhook policies
❌ robot         Robot Account

✅ login         Log in to Harbor registry
✅ user          Manage users

✅ registry      Manage registries
❌ replication   Manage replication

✅ config        Manage the config of the Harbor CLI
✅ cve-allowlist Manage system CVE allowlist
✅ health        Get the health status of Harbor components
✅ instance      Manage preheat provider instances in Harbor
✅ info          Display detailed Harbor system, statistics, and CLI environment information

✅ scanner       scanner commands
✅ schedule      Schedule jobs in Harbor

✅ completion    Generate the autocompletion script for the specified shell\
✅ help          Help about any command
✅ version       Version of Harbor CLI
```

Looking for Contributors

- Migrating E2E pipelines to GitHub Actions
- UI/UX of Harbor
- Improve capabilities of Harbor CLI
- Actively looking for contributors and maintainers to grow with us!
